

Cast Registration

Bruno 7/10/2008

Goal

- Register the Cast (CT) in MRI

Approaches

- Manual registration
- Semi-automated registration
- Fully-automated registration

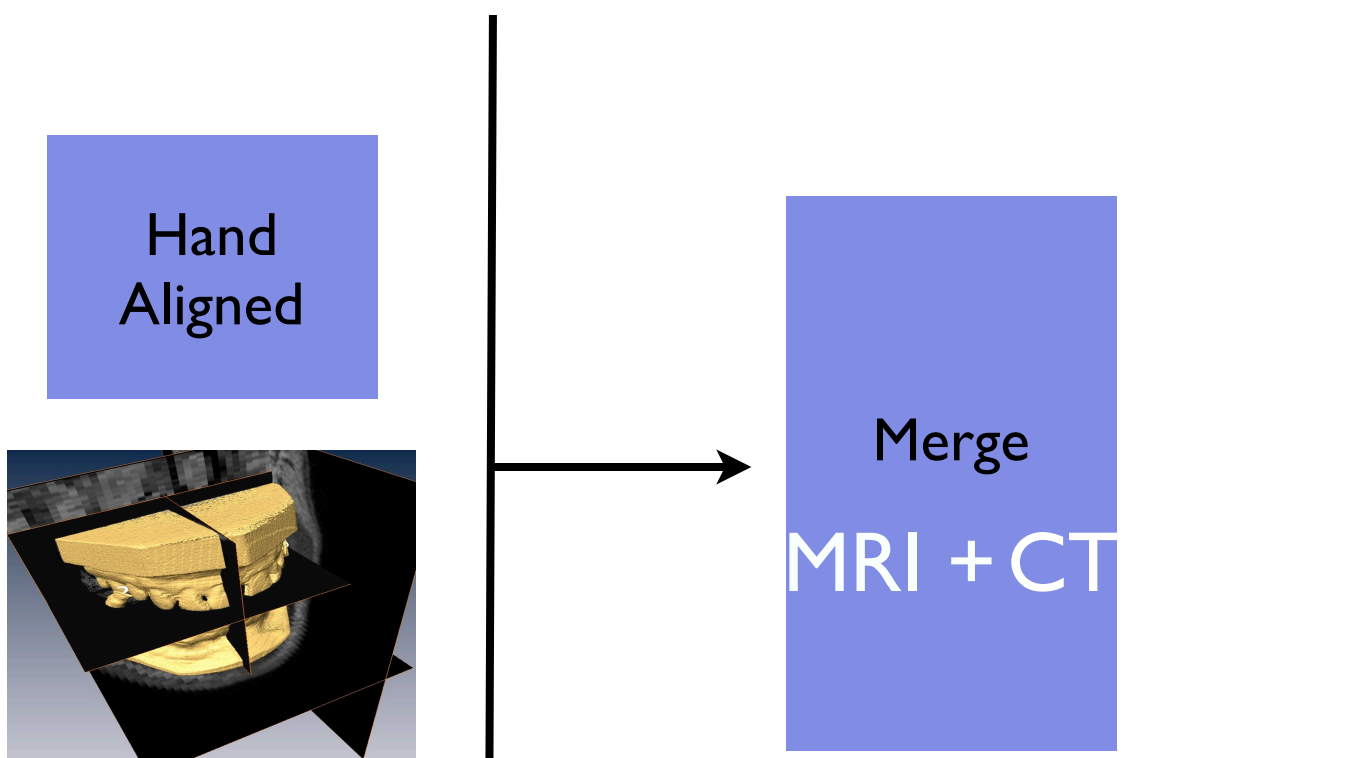

Approaches

1. Hand aligned (manual)
2. Hand Selected markers (semi-automated)
 1. MRI data
 2. CT data

➔ Manual registration

Registration

I - Hand Aligned

➔ Semi-automated registration

Registration

2- Hand Selected Markers

Manual

Selected Markers
MRI

Selected Markers
CT

1

A - Rotation
T - Translation
S - Scaling

Rigid body
Least Square

Find A,T,S

2

Transform
A,T,S

Apply A,T,S

3

Automated

Merge
MRI + CT

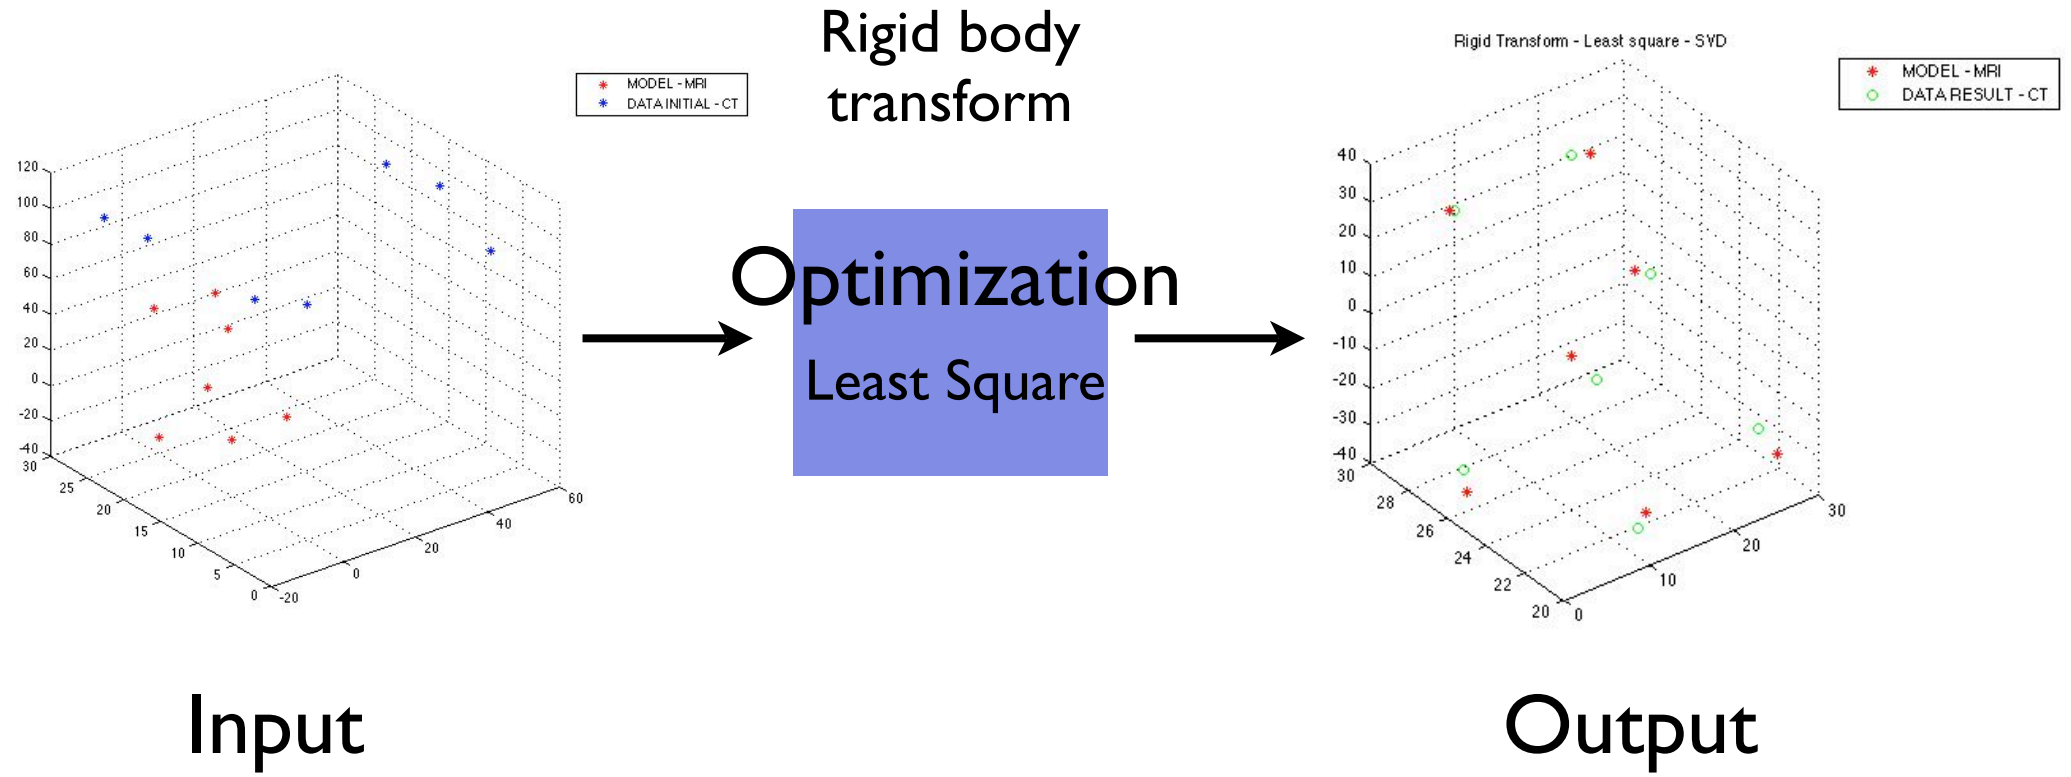

4

➔ Semi-automated registration

Registration

2- Hand Selected Markers

2

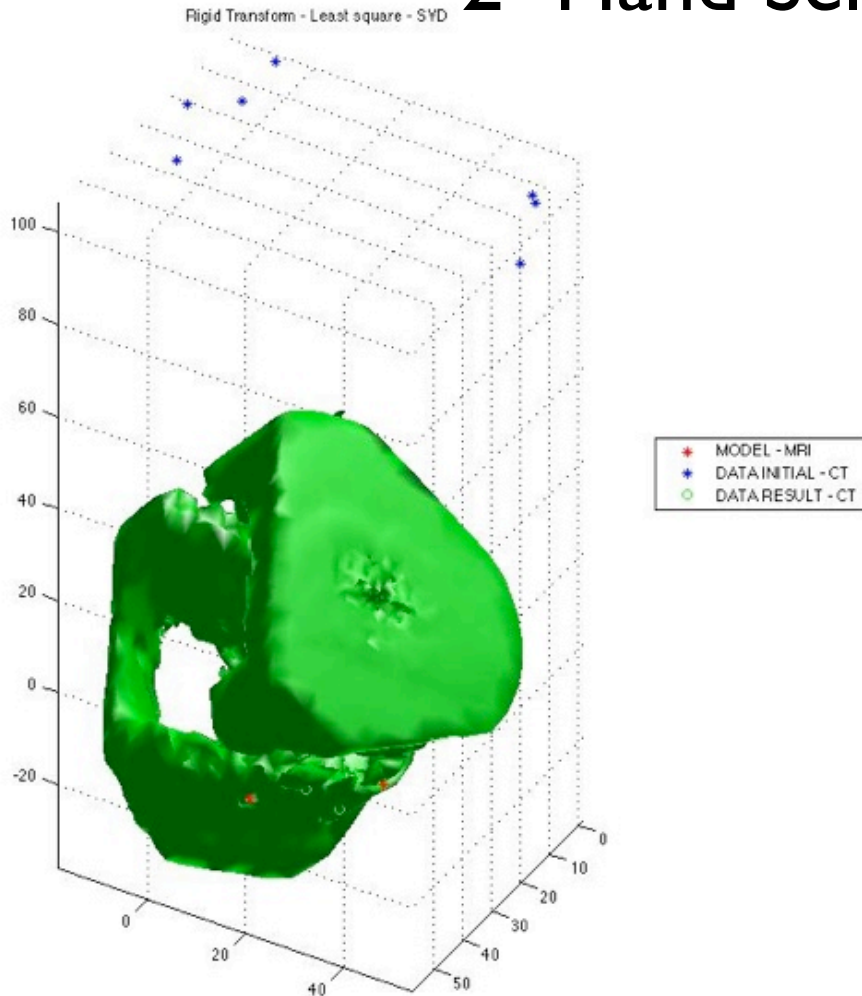

➔ Semi-automated registration

Registration

2- Hand Selected Markers

3

$$A = \begin{bmatrix} -0.0553 & -0.9917 & 0.1161 \\ -0.0152 & -0.1154 & -0.9932 \\ 0.9984 & -0.0567 & -0.0087 \end{bmatrix}$$

$$T = \begin{bmatrix} 16.3909 \\ 120.9540 & -18.0446 \end{bmatrix}$$

$$S = 0.9408$$

?

$$error = \sum_{i=1}^{i=7} \sqrt{(p_{ixmri} - q_{ixct})^2 + (p_{iymri} - q_{iyct})^2 + (p_{izmri} - q_{izct})^2} = 7.004$$

➔ Semi-automated registration

Registration

2- Hand Selected Markers

4

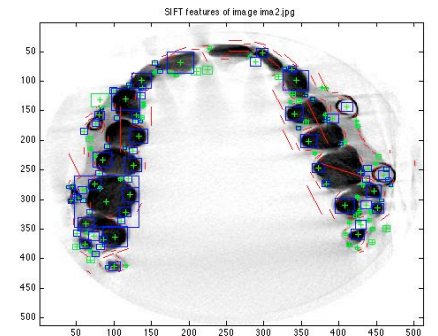

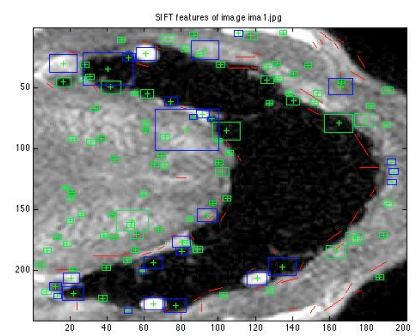

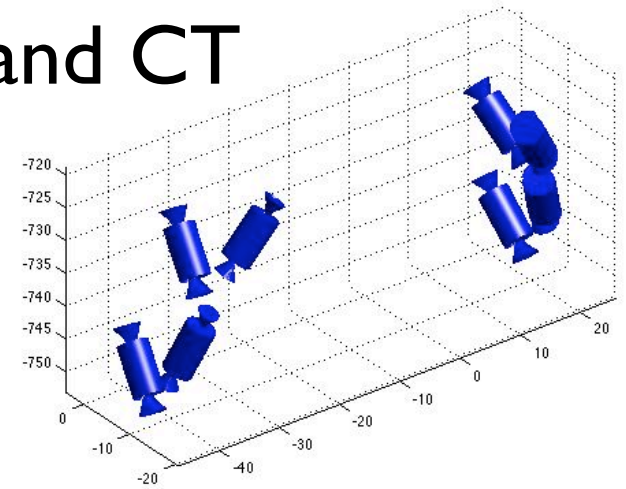

Results

Future Work

➔ Fully-automated registration

- Find Centroids of markers in MRI and CT
 - All data;
 - markers areas;
- Find SIFT features in CT and MRI
 - All data;
 - markers areas;

Future Work

- ITK toolbox or Amira Registration - Mutual Information - Correlation - Euclidean
- ITK - MRI interpolation
